

RAKE-WELL

MANUAL RAKING MACHINE

Raking Machine which has been specifically designed & developed for Poultry Litter Management. Raking is necessary for Poultry to keep good health of the birds and hence the profitability. It helps producers keep the litter dry in the best condition possible all the time. As the machine moves through the farm it will allow the air to act in the litter, mixing and drying it. This in turn reduces the moisture in the litter. It does not allow formation of lumps. This helps to reduce accumulation of CO₂ & Ammonia in the farm.

Salient Features

- # Economical in comparison with motorized raking machines & affordable to even small poultry farmers
- # An average person/labour can assemble, understand & operate it easily
- # Easy maintenance & zero operating cost
- # Rakes faster, minimum physical efforts
- # Better working & environment condition
- # Helps to keep litter dry managing moisture
- # Helps to remove ammonia significantly
- # Reduce diseases
- # Reduce labour dependency
- # Improves FCR

Technical Specification

Number of Blades	: 12	Machine Weight	: 17kg. Net
Blade Dimensions	: Dia-240mm, L-380mm	Packing Size	:
Blade Material	: MS	Capacity	: 5000sq.ft/Hr.
Reverse Operating	: No	HS Code	: 84328020
Raking Adjustment	: Yes both side available		
Detachable Handle	: Yes also extendable		
Colour Coating	: Powder Coated		
Assembly Requires	: Partially required		

Product Code: RM5
